

Volker Cloud Automation Platform Accurate, Accelerated & Seamless Cloud Deployments

The Volker Cloud Automation Platform provides DevOps and migration teams with Planning, Provisioning, and Compliance capabilities to facilitate factory scale cloud initiatives. As an integral part of Candid Cloud Factory, Volker makes it easy to specify and auto-generate the infrastructure components you want to deploy, allowing enterprises to transition to the cloud efficiently, consistently, and securely.

According to Bloomberg Intelligence, organizations realize savings of 30% when switching from on premise infrastructure to a cloud framework.
-Bloomberg Intelligence, Industry Report & Investment Case, April 2017

Reduced Time, Risk, & Resources

The Volker Cloud Automation Platform helps DevOps and migration teams facilitate factory-scale initiatives. As an integral part of Candid Cloud Factory, Volker makes it easy to specify and auto-generate the infrastructure components you want to deploy, allowing organizations to transition to the cloud efficiently, consistently, and securely.

Volker automates three key segments of your cloud journey: Planning, Provisioning, and Compliance.

Planning

A typical cloud initiative may migrate hundreds or even thousands of workloads to the cloud. Volker helps IT rigorously plan each migration ahead of time, making it easier to know the ideal app order, time constraints, and costs for migration.

Volker works with CMDB and discovery tools to enable IT teams to systematically identify every workload and plan for their migration to the cloud.

Based upon an industry-defining programmatic approach, Volker creates a view of the relative business value of each application and the complexity of migrating the applications to the cloud, Volker makes it easy for IT teams to characterize every application and server.

Provisioning

Migrate faster and more efficiently leveraging automation to develop libraries of reusable code that streamlines cloud initiatives.

IT uses Volker to specify all aspects of the applications, servers, cloud platform components and accounts.

Leveraging automation to generate the code required to accomplish the necessary application and account level setup, Volker creates and configures your infrastructure, so your application teams can directly integrate their code.

Compliance

Breathe easy knowing Volker will lead your organization securely to the cloud. Volker reduces the risk your initiatives will stall out and ensures end-to-end compliance.

Volker adds automation steps within a CI/CD pipeline to ensure the infrastructure, configuration, and software meet compliance standards before they are ever deployed.

After deployment, Volker continuously monitors your cloud resources to ensure they remain compliant with regulatory frameworks and organizational standards.

Leading through Innovation

Volker leads your organization into the cloud efficiently, consistently, and securely; speeding your initiatives through its programmatic approach to Planning, Provisioning, and Compliance.

About Candid Partners

Candid Partners is an Atlanta-based technology and management consulting firm and Advanced Consulting Partner in the Amazon Web Services (AWS) Partner Network. Candid combines enterprise-class scale and process with born-in-the-cloud domain expertise. Candid's management consultants come from the world's top firms and are skilled at turning complex business needs into specific technology solutions. Together with Candid's cutting-edge architects and DevOps specialists, they are helping complex enterprises reap the benefits of the public cloud. To learn more about Candid Partners and to find out how you can benefit from the public cloud, visit www.candidpartners.com.
