

Candid CloudOps™

Stay ahead of emerging competitors with accelerated application delivery

Candid CloudOps™ combines the expertise, proven methodologies and tools organizations need to improve operations and deploy applications in the cloud more effectively. As organizations gain the ability to quickly innovate and increase speed to market, they respond more accurately to competitive threats and better satisfy their customers.

“DevOps-led projects will accelerate the delivery of capabilities to customers by an average of 15-20%.”

— Stephen Elliot, IDC analyst

Disruptive technology trends are impacting organizations, encompassing all aspects of business and technology. To keep pace with new and unexpected competitors leveraging the cloud as a real differentiator, enterprises need to deliver innovative technology products and services. And they must create applications with greater speed and quality—without hits to reliability or security. DevOps has evolved from this environment to help organizations transform processes that deliver applications and services at a higher velocity.

While transforming to a high-performance DevOps environment provides a clear competitive advantage, change doesn't come easily to most organizations. Transformation is further complicated as companies deploy cloud applications.

Maximize Cloud Operations ROI

Candid CloudOps™ mirrors the principles of today's modern DevOps philosophy, integrating Amazon Web Services (AWS) processes and tools that accelerate application delivery while increasing security, and meeting compliance and governance

requirements. Our experts blend DevOps knowledge and AWS proficiency to guide development teams to better align the people, processes and technology needed to facilitate successful cloud initiatives.

Candid Partners CloudOps provides an efficient governance model that allows organizations to maintain quality and configuration of their infrastructure environments. This established model also enforces security and compliance rules, allowing application development teams to retain control over their processes and toolsets.

Candid Partners is one of a select group of companies that has attained the AWS DevOps Competency. Candid CloudOps™ was integral in achieving this status by providing a proven practice that strikes the right balance of expertise, established standards and innovative tools.

Accelerate Application Delivery

Candid CloudOps™ accelerates speed to market while making processes more scalable and efficient. As an AWS Advanced Consulting partner, Candid Partners follows AWS best practices and industry standards that include:

- **Automation**—increases agility, reliability and scalability to better respond to market changes
- **Infrastructure as code**—leverages a highly-integrated software development process with operational support
- **Tools and technologies**—implements across all functions to meet an organization's unique needs
- **Security integration**—identifies security requirements upfront and integrates with development processes
- **Continuous Integration/Continuous Delivery pipeline**—allows developers to build code collaboratively and streamline application development to quicken release cycles, lower costs and mitigate risks

Why Candid CloudOps™

DevOps can be a game changer for most organizations, particularly when managing the added complications involved with cloud migration. Transforming into a high-performing DevOps culture delivers an array of benefits when moving to the cloud, from improving employee satisfaction, to reducing time spent remediating security issues. The key is to find experts with proven enterprise grade continuous integration and deployment capabilities, with a high level of automation.

Candid Partners provides critical expertise and long-term stability with the right toolset that can flex and grow with each customer's evolving business goals. Working with Candid Cloud Factory™ and the Volker Cloud Migration Tool™, Candid CloudOps™ delivers reliable solutions that increase efficiencies and enable organizations to focus more on core competencies that build their bottom line.

About Candid Partners

Candid Partners is a management and technology consulting firm headquartered in Atlanta, Georgia. The company delivers extensive technology, cloud migration and IT infrastructure knowledge and proficiency, and is one of the few firms with deep expertise in Amazon Web Services migration. As an AWS Advanced Partner, Candid Partners helps Fortune 100 companies increase performance levels through innovative software solutions and IT services.
